Experience

Senior Frontend Development Engineer

January 2022 - Present

Dropbox

- Owned, led, and implemented company-wide year-long modernization initiatives.
- Created new incident management system; achieved total onboarding within four months.
- Created and deployed single sign-on service (cookies, CSRF tokens).
- Standardized deployment process for internal React web applications.

Systems Development Engineer II

November 2018 - January 2022

Amazon

- Migrated jQuery front-end onto serverless React app (S3, Lambda, Typescript). Achieved 100x improvement in performance, 4x reduction in cost.
- Mentored engineering team; set goals; ensured deadline compliance.
- Implemented robust standards for JavaScript and TypeScript development.

Site Reliability Engineer

Jan 2017 - November 2018

Palantir

Jan 2015 - Aug 2015

- Wrote Pager Duty analytic tool; enabled improved processing and filtering of frequent paged problems.
- Embedded with internal implementation teams; served as primary product/support engineer.
- Implemented puppet automation and best security practices.
- Created load tool and metrics collector; enabled cross-fleet server testing.
